Description

Step aboard the 2024 Oxford Blue Eurocruiser, crafted by the renowned Collingwood Boat Builders Ltd. This brand-new model is a stunning example of modern engineering and design, blending the comforts of a luxury apartment with the freedom to explore inland waterways. With an array of top-of-the-line features, cutting-edge technology, and impeccable craftsmanship, this Eurocruiser sets a new standard for leisure boating.

The exterior of the Oxford Blue Eurocruiser is as elegant as it is robust, featuring a New Improved 2 Pack Epiphanes External Paint Coating that ensures lasting protection and a vibrant, pristine finish. The full pram cover on the Eurocruiser stern not only shields the deck from the elements but creates a comfortable, inviting outdoor space. The upholstered wrap-around seating accommodates up to eight people, making it perfect for socialising or relaxing as you glide through serene waters.

The reverse layout maximises space and functionality while offering a luxurious living experience. Upon entering from the stern, you're greeted by the galley—a culinary haven outfitted with high-end appliances and premium finishes. From the sleek white granite breakfast bar to the spacious high and low cupboards, every inch of the kitchen is thoughtfully designed. You'll find a full-size washer/dryer, a separate fridge and freezer, a four-burner hob, and a separate oven and grill, along with a dishwasher and a wine cooler. The Belfast sink with a mixer tap adds a classic touch to this modern kitchen.

Moving forward, the open-plan saloon is designed for both comfort and style. The centerpiece is a large, plush sofa that converts into a double bed, offering flexibility for additional guests. A Morso solid fuel stove adds warmth and charm, while the large double-glazed skylight floods the space with natural light. Entertainment is at your fingertips with a 40" LG Smart TV and a Panasonic theatre sound bar, providing a cinema-like experience on the water. The saloon also features ample display shelving and built-in storage, ensuring a clutter-free environment.

The bathroom is a true retreat, combining luxury and practicality. Featuring a double-size glazed shower, his-and-hers washbasins, and a ceramic pump-out toilet, it is both spacious and elegantly appointed. Generous storage options keep essentials tucked away,

ensuring a serene, uncluttered atmosphere.

The bedroom at the bow is a sanctuary of relaxation. The full-size double bed offers restful sleep, while the floor-to-ceiling mirrored wardrobes provide ample storage for your belongings. Additional bedside units and a large dressing table enhance the room's functionality, making it a comfortable and organised space. The bedroom opens out onto the well deck through glazed hardwood doors, offering a seamless connection to the outdoors. Wake up to tranquil water views and enjoy peaceful moments on the well deck.

At the heart of this Eurocruiser is a brand-new Canaline 70hp Turbo engine, delivering powerful yet efficient performance. Whether navigating narrow canals or wider rivers, the PRM 150 gearbox ensures smooth transitions and reliability. The bow thruster—a Vetus 95KGF—makes precise maneuvering a breeze, even in tight spaces. This engine system, combined with the 2 Pack Epoxy hull treatment for long-lasting protection, guarantees that your Eurocruiser is as durable as it is luxurious.

This Eurocruiser is equipped with a Victron 3Kw Inverter/Charger to provide consistent power, whether you're connected to the shoreline or relying on the boat's domestic batteries. Heating is controlled by a 5Kw Webasto diesel boiler, which powers radiators and towel rails, ensuring warmth throughout the cabin. Additionally, the boat's water and heating systems include a 59-litre twin coil calorifier and a 1Kw immersion heater, ensuring you have plenty of hot water for showers and household use.

The vessel boasts a 575-litre water tank, a 250-litre waste tank, and a 330-litre fuel tank, all designed to support extended journeys without frequent stops. The LPG gas system, with space for two 13Kg gas cylinders, powers the stove and other appliances, giving you the independence to travel comfortably.

This boat is not just about luxury—it's also designed for convenience and practicality. With spray foam insulation, it offers excellent thermal efficiency, making it perfect for year-round use. Five high-capacity batteries—one for starting, three domestic, and one for the bow thruster—ensure you have reliable power wherever you go.

The thoughtfully positioned side hatch in the galley invites fresh air and natural light into the boat, adding to the sense of spaciousness. Whether you're cooking, relaxing in the saloon, or enjoying a meal in the well-equipped galley, this Eurocruiser ensures every aspect of boat life is as enjoyable as possible.

Combining superior craftsmanship, innovative design, and all the amenities of modern living, the 2024 Oxford Blue Eurocruiser offers a luxurious, comfortable home that can take you anywhere. Perfect for those seeking adventure without sacrificing comfort, this boat is truly a floating retreat where you can escape, explore, and enjoy life on the water.
