Price: £149,950

Key Features

Location:	Tattenhall Marina
Berths:	4
Length:	60ft
Type:	Widebeam
Year:	2013

Description

Can't Stop Me Now is an exceptional 60ft x 10ft widebeam from the renowned Aqualine Marine, offering both quality craftsmanship and intelligent design. Built in 2013 and purchased as an ex-demo, the boat has been lovingly maintained by its current owners for over a decade. As a 10ft wide beam, it offers more flexible navigation options compared to wider models, while still providing a spacious and luxurious interior.

The boat features a beautifully equipped galley with granite worktops, a full-size oven with separate grill, a 4-burner gas hob, stainless steel integral sink with drinking water filtration, and ample storage including a wine rack. Adjacent to the galley is a granite-topped breakfast bar with two adjustable stools, creating a sociable and stylish dining space.

The saloon is warm and welcoming with a comfortable three-seater sofa that converts into a double bed, a Morso Squirrel solid fuel stove, and a smart TV set within a bespoke media unit. Thoughtful storage solutions, including a mix of shelves and cupboards, make this a practical and inviting space to relax.

The luxurious bathroom includes a full-size quadrant shower with sliding doors, a ceramic corner basin atop a granite counter, a ceramic pump-out toilet, and a full-size washing machine. Extensive storage options ensure functionality matches style.

In the bedroom, a kingsize bed is complemented by an impressive range of wardrobes, drawers, and cupboards. Glazed double doors open out onto the large cratch-covered bow, which features upholstered seating - perfect for enjoying peaceful views.

Additional features include a stainless steel 644-litre water tank, a 215-litre waste tank, and a 360-litre fuel tank. The boat is powered by a Barrus Shire 50hp engine and comes with a 3kW Victron inverter/charger, solar panels, and a galvanic isolator. Hot water is supplied via engine, calorifier, immersion heater, and Webasto diesel boiler, which also powers the central heating system.

Recent works include a full hull grit blast and three coats of Jotun 2-pack epoxy applied in 2023, along with eight new anodes. A recent survey from August 2023 is available to view, and the boat safety certificate is valid until September 2029.
